NH Cities and Towns With Statistically Higher Than State Teen Birth Rates, 1998-2002

City/Town	Births to 15-19 Year Old Females	Estimated Female 15-19 Population	Teen (15-19) Birth Rate / 1,000	95% Confidence Interval of the Rate
Allenstown	27	702	38.5	(25.3, 56.0)
Ashland	28	292	95.9	(63.7, 138.6)
Berlin	77	1609	47.9	(37.8, 59.8)
Boscawen	20	457	43.8	(26.7, 67.6)
Claremont	108	2118	51.0	(41.4, 60.6)
Farmington	65	1072	60.6	(46.8, 77.3)
Franklin	85	1433	59.3	(47.4, 73.3)
Hillsborough	38	895	42.5	(30.0, 58.3)
Hinsdale	26	644	40.4	(26.4, 59.2)
Laconia	107	2731	39.2	(31.8, 46.6)
Lebanon	67	1921	34.9	(27.0, 44.3)
Littleton	41	936	43.8	(31.4, 59.4)
Manchester	709	16586	42.7	(39.6, 45.9)
Milton	27	640	42.2	(27.8, 61.4)
Nashua	415	12867	32.3	(29.1, 35.4)
Newport	52	902	57.6	(43.1, 75.6)
Northfield	40	926	43.2	(30.9, 58.8)
Northumberland	23	450	51.1	(32.4, 76.7)
Ossipee	29	634	45.7	(30.6, 65.7)
Pittsfield	45	745	60.4	(44.1, 80.8)
Raymond	55	1767	31.1	(23.4, 40.5)
Rochester	225	4651	48.4	(42.1, 54.7)
Seabrook	55	843	65.2	(49.2, 84.9)
Somersworth	78	1860	41.9	(33.1, 52.3)
Swanzy	37	989	37.4	(26.3, 51.6)
Winchester	44	685	64.2	(46.7, 86.2)
New Hampshire	4872	214219	22.7	(22.1, 23.4)

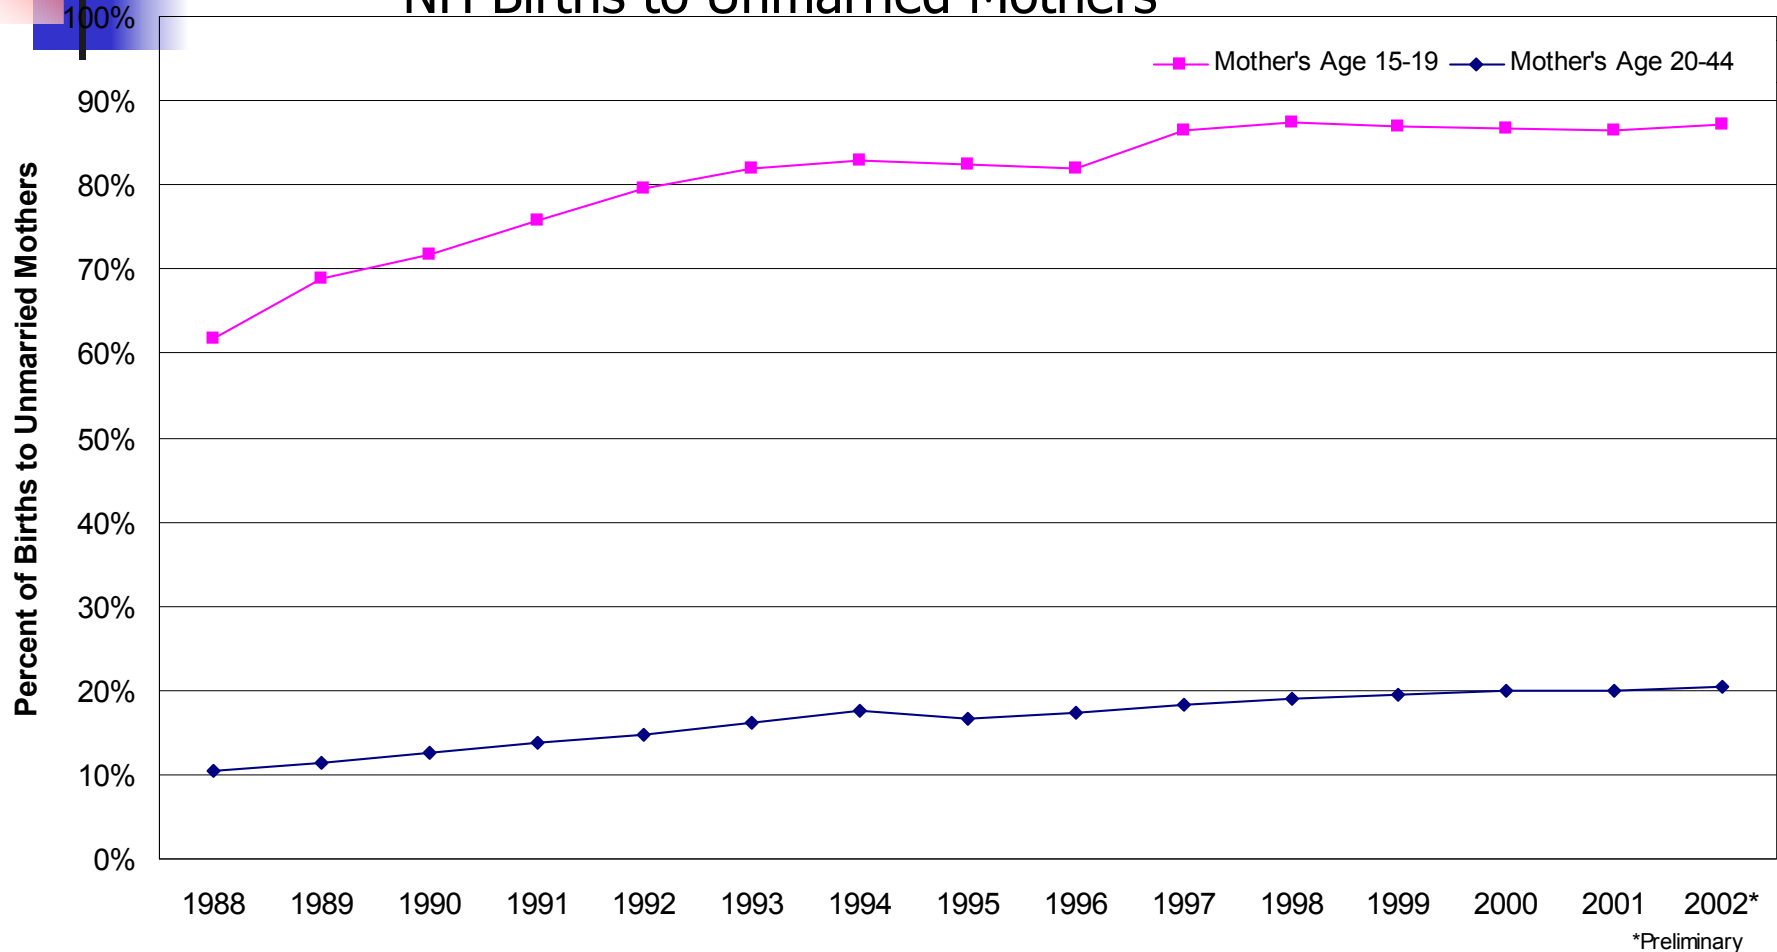

Note: City/Town rates presented are those where the rate is significantly different from the state at the 95% confidence level

NH Youth Risk Behavior Survey, 2001

- School based survey conducted every other year by the NH Department of Education.
- Data reported in the next few slides is from 2001. Sample was not large enough to be statistically valid so can't be compared to other years of data.
- 2003 survey will have statistically valid results. Should be available in December or January.
- 2003 will probably be similar to 2001, so for now use 2001 to give an idea of what the valid data will be upon release.

Sexuality and New Hampshire Teens

NH Youth Risk Behavior Survey, 2001 (Cont'd)

- Approximately 40% of high school students reported having had sexual intercourse. By grade, approximately:
 - 20% of 9th graders
 - 35% of 10th graders
 - 52% of 11th graders
 - 71% of 12th graders
- Percentage reporting sexual intercourse for the first time before age 13 was approximately:
 - 3% for girls
 - 7% for boys
- Percentage of students that had been pregnant or gotten someone pregnant was approximately 3%
- Of the students who reported having sexual intercourse in the last three months, the percentage of students who reported:
 - Using a condom during last sexual intercourse was approximately 57%
 - If female, using the birth control pill was approximately 33%
 - Drinking or drug use prior to sexual intercourse was approximately 21%
